# Notate Cards Features

This is what Cards can offer you:

Cards takes the chaos out of business cards. Never fumble through a stack of business cards again. With just two taps, take a picture of a business card and have it automatically stored and synced as an Outlook contact.

- ✓ Scan and recognizes business cards automatically
- ✓ Automatically detects language
- ✓ Creates a contact automatically in Outlook
- ✓ Syncs with Outlook and Exchange

**Recognition languages:** English, French, German, Italian, Spanish, Dutch, Traditional and Simplified Chinese, Danish, Finnish, Korean, Norwegian, Japanese, Portuguese, Hungarian, Swedish, and Russian.

## Why Notate Cards?

ENTERPRISE GRADE SECURITY - With Cards all your information remains secured within your own network. No additional servers are required. Secured by BlackBerry Dynamics, business card data is secured with FIPS-certified encryption. No card information ever resides in the cloud and is instead synced and backed up via a secure tunnel to the corporate Exchange server.

The next time you are handed a business card, simply scan and save, and never lose track of the contact again.
