# Notate Docs Features

This is what Docs can offer you:

Stay productive while mobile. Docs is a must have for anyone who needs to securely access and annotate documents while on the go. Docs lets you open and annotate documents from SharePoint, File Shares, and Box.net. You can also scan paper documents into PDF format.

## Docs allows you to:

- ✓ Open corporate documents while on the go
- ✓ Annotate PDF documents
- ✓ Scan documents, photos, receipts, and more into PDF
- ✓ Create PDFs from Word documents

Docs integrates with BlackBerry BEMS server for secure access to corporate SharePoint and File Shares. Docs also integrates with BlackBerry Work, and Notate, so that you can easily annotate document attachments.

## High quality annotations include:

- ✓ Highlight text
- ✓ Handwritten annotations (Apple Pencil support)
- ✓ Review documents and make notes or corrections
- ✓ Sign documents

## Why Notate Docs?

ENTERPRISE GRADE SECURITY - With Docs all of your information remains secured within your own network. No additional servers are required. Secured by BlackBerry Dynamics, documents are secured with FIPS-certified encryption. No documents ever reside in the cloud and is instead are synced and backed up via a secure tunnel to corporate file shares.

Docs helps busy Professionals organize important meetings, improve team productivity and information sharing.

---

## About Shafer Systems

Notate is a product of Shafer Systems. Shafer Systems is a privately held company founded in 2010, located in Dallas Texas. We are focused on improving enterprise productivity with mobile solutions. Our flagship product, Notate, was one of the first ISV applications available for the BlackBerry Dynamics platform and is a mature and best-selling product.
