# AirWatch Console Configuration
# for Notate for Enterprise

1. First navigate to Apps & Books -> List View
2. Select the "Public" Tab
3. Click "Add Application"

4. Search for Notate for Enterprise from the iOS App Store

5. Select Notate for Enterprise

6. Click on the Assignment tab and assign the app to a group

7. Click on the Deployment Tab

8. Select Make App MDM Managed
9. Select Use VPN and configure for your per App VPN Profile (See AirWatch documentation for instructions on how to configure a secure tunnel)

10. Select Send Application Configuration
11. Click "Upload XML" and choose the AppConfig.XML file found here: http://support.shafersystems.com/customer/en/portal/topics/804185-notate-for-enterprise/articles
12. Adjust the following configuration keys and values as needed

Key	Description	Default Value
licensingKey	Allows for synchronization and sharing and Notate policy controls from the EMM admin portal.	Licensing key is sent via email when trial is set up or product is purchased

autodiscoveryURLs	Note: This setting is NOT required if your autodiscovery URLs are in standard locations. Server URLs are separated with a semicolon and no space. URL example: http://autodiscover.domain.com/autodiscover/autodiscover.xml;https://domain.com/autodiscover/autodiscover.svc	
exchangeURL	Allows user to synchronize notes with Exchange server. **Note**: This setting is NOT required unless autodiscovery is not possible for your environment. To specify the EWS URL use the format: https://server.domain.com/EWS/Exchange.asmx	
userEmail	If provided, the user won't be asked to provide their email address.	{EmailAddress}
userName	If provided, the user won't be asked to provide their username.	{EmailUserName}
disablePeerVerification	Enables the user of local/private certificates on the Exchange Server	true
allowiOSEmail	A value of 0 disables use of sending notes with native iOS email. Open In is still supported.	true
annotationCompression	Handwriting and Annotations are compressed by default to save storage space. Values are: 2 = high compression, 3 = medium compression, 4 = no compression	2
allowAnnotations	Allows the use of handwriting and highlighter tools.	true
allowGeotag	User is permitted to automatically record location of notes.	true
allowHyperlinks	Allows hyperlinks to be active within notes. Safari browser is launched.	true
allowGallery	Allows the access and use of the device photo/image gallery	true
allowVoiceRecordings	Permit the use of audio recordings	true

allowCamera	Allows the user to insert photos from the device camera into notes	true
allowWebClippings	Allow users to insert web clippings into notes.	true
allowSharing	Allow users to share notebooks with other users.	true
allowAttachments	Allow users to insert documents into notes.	true
allowTasks	Allow users to manage tasks in Notate.	true
SSClipboardIsRestricted	Prevents data leakage from the app through the system clipboard	true
SSPassCodeStyle	Enables app pass code. Supported styles are: None, Digits, Alpha	None
allowCrashReports	Enable generic crash reports without user data to be sent to the developer.	true
