

Winter 18 Release - Known Bugs

We know about the following bugs in the Winter 18 release, and we're working on getting them fixed!

- Incorrect image alignment on Knowledge articles
- The 'Site name' and 'published date' for Content are not visible on Dashboard and Tiles
- Updating Page Category as a bulk action is not working
- User name of the person who created an Album is not visible when Album is added to Site Dashboard, Site name is shown instead
- Inactive videos in vBrick still play when embedded in a Page or in the Carousel
- GIFs autoplay in the Carousel and Tiles
- Profile images not loading in Internet Explorer 11
- Error when searching for Topics using Edge on a Surface tablet
- Content showing most recent edited date as being today when it has not been edited
- Batch error email received when Site Storage changed to Google Drive
- "Could not perform action" error message sporadically appearing
