

# Winter 18 Release notes

## (Abridged)

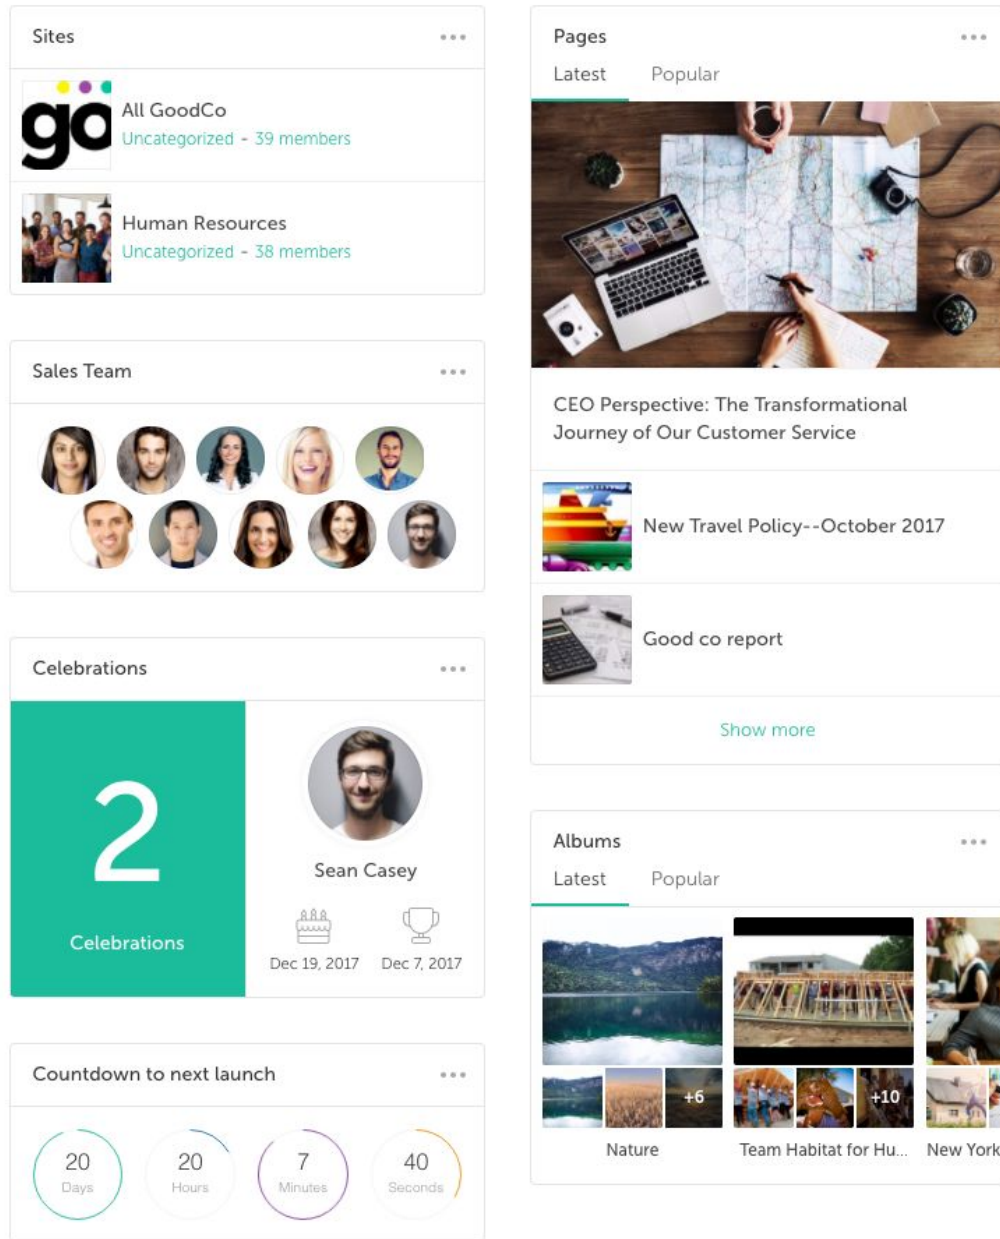

For the 2018 Winter release we've redesigned the navigation throughout: all main navigation is now in the header, the left hand navigation bar has been removed, and all icons are labelled.

We've also completely redesigned the Carousel: it displays multiple items at a time, Albums show a grid preview of images, with a slideshow on click, and you can include external content, such as videos or weblinks.

AND we've redesigned many of the Tiles (lots of redesigning going on!). We've streamlined the Adding Tiles process, created new 'All Content' Tiles, new Showcase Tiles with larger image previews, Avatar, Grid and List variations of the people Tile and much more.

And what's more, we've greatly improved Search speeds! Up to 6x Faster!

For more info on the above and all of the other changes we've made have a read of the full release notes
