

# Spring '18 - Patch 1 Release Notes

Below is a list of improved features and the issues that have been fixed in the Spring '18 patch:-

---

## Improvements

### Segments / Subscriptions

- App Manager was unable to edit 'All Segments' Subscriptions
- App Manager is no longer able to edit 'Segment' field in a Subscription
- Users with Home Management privileges was still able to manage Home after Segments were enabled
- 'You belong to this Segment' label was not moving while editing Segments
- If a field is not in use it should still appear in drop down but be greyed out

### Smart Search

- Clearer messaging and explanation of Smart Search in Manage Application > Integrations
  - Prior to enabling we will check whether there are any Files to index
  - Labels on Post Install page are updated
  - While Smart Search is being setup there will be a 'Indexing' label, once it has been setup the label will read 'Enabled'
  - 'Connect' & 'Disconnect' buttons are no longer available for anyone other than a Simplr System Admin.
  - The Smart Search modal has been removed as it was no longer accurate for the setup process
  - Search terms using special characters were returning an error
-

## Bugs Fixed

- Null values not being ignored from Workday. Null values (apart from name & email) should clear existing value on mobile
- Batch failure emails being received because of Dropbox integration.
- Old Content links no longer working
- Links tile missing
- 'Add New Folder' button is now only be visible to App Managers if File Upload Permissions are limited
- Exception occurring while searching Sites
- 'App Manager' field in Manage Application > Setup > Privileges is now mandatory, the org must have at least one App Manager set at all times.
- Re-activated Site not visible in global Search
- Icon not appearing on Files shared from an external source
- Updated version of file not displayed on content detail page
- Event or Page tabs not working on new Sites
- H4 heading when used in a list no longer adds extra spacing
- 'Dashboard & Feed' and 'Feed' tabs appearing on same Site on mobile
- Unable to drag, edit or delete Tile on the People Index
