

# Summer 18 – Patch 5 Release Notes

Version: v1.251.10

Installation URL:

<https://login.salesforce.com/packaging/installPackage.apexp?p0=04t01000000f6v1>

Below is a list of the issues that have been fixed in this Summer '18 patch:-

---

## Bug Fixes

- Unable to change the order of links in the Links Tile
- Unable to create a Feed Post that includes a link and attached Files
- Unlisted Sites being deleted in error
- Pages not becoming visible to all users when an Unlisted Site is converted to a Public Site
- File preview not working for .dotx Files
- Images in Content not appearing for Standard Users if they have been added, deleted, then 'undo' has been used to re-add the image.
