

Summer 18 – Patch 8 Release Notes

Version: 1.251.13

Installation URL:

<https://login.salesforce.com/packaging/installPackage.apexp?p0=04t0I000000f6xq>

Below is a list of the issues that have been fixed in this Summer '18 patch:-

Bug Fixes

- Incorrect number of Followers on Profile. There is a limit of 1000 that can be displayed, we have now updated so that it will display 999+
- Company logo appearing too narrow on the mobile app
- 'Middle Finger' emoji removed
- 'Add Blog' option not appearing in User Menu when Content Submissions are disabled

Improvements

- The Department filter in the People index is now a searchable field. Previously clicking into the field opened a list of all Departments, however this was restricted to 1000 items, so for a larger organization with more than one thousand departments this would cause issues.
