

Summer 18 – Patch 9 Release Notes

Version: 1.251.17

Installation URL:

<https://login.salesforce.com/packaging/installPackage.apexp?p0=04t01000000f70p>

Below is a list of the issues that have been fixed in this Summer '18 patch:-

Bug Fixes

- Unable to create Content with Topics
- 'Simplr.BatchVerifyAnalyticsData' batch process failing and returning error message
- 'Simplr.BatchPeopleAnalytics' batch process failing and returning error message
- Direct Reports on Profile not displayed in alphabetical order
- Incorrect figures displayed in Social Campaign analytics
- Profile images appearing blurry on hover
- When File Upload settings are set so that Users can only upload images it was still possible to upload other file types by dragging and dropping them into the text area of the Feed
- App opening in two tabs when logging in from Salesforce Lightning

Improvements

- App Managers and Site Owners/Managers can now rearrange the order of Pages that are displayed in the Categories listings
