Version: 1.251.19

Installation URL:

<https://login.salesforce.com/packaging/installPackage.apexp?p0=04t01000000f71d>

Below is a list of the issues that have been fixed in this Summer '18 patch:-

Bug Fixes

- Error "Could not load Analytics" displayed when trying to access analytics
- Images in Carousel appearing blurry
- Unable to edit a User Editable Custom Profile Field
- Preview image on File Detail page not being updated to most recent version of file
- Event information not being passed onto Office 365 Calendar when 'Add to Calendar' is selected
