

Summer 18 – Patch 12 Release Notes

Version: 1.251.21

Installation URL:

<https://login.salesforce.com/packaging/installPackage.apexp?p0=04t01000000f735>

Below is a list of the issues that have been fixed in this Summer '18 patch:-

Bug Fixes

- 'Unexpected server response' message displayed when a file preview is waiting to load in Salesforce, this has now been updated to show the message 'It may take some time to show the preview - please refresh'
- Improvements to the table batch size for Analytics
