

Summer 18 – Patch 11 Release Notes

Version: 1.251.20

Installation URL:

<https://login.salesforce.com/packaging/installPackage.apexp?p0=04t01000000f72W>

Below is a list of the issues that have been fixed in this Summer '18 patch:-

Bug Fixes

- Actionable notifications for Subscription approvals not disappearing after Subscription has been approved
- Site Managers unable to upload images to an Album when file upload permissions are set to 'Disable file uploads from Feed, site files, & content attachment'
- Mobile - On Android phone tapping on a Site takes user back to Home screen
- Cursor not changing to show that image is a clickable hyperlink

- 'Missing PDF file' message displayed when a file preview is unavailable, this has now been updated to show the message 'There's no preview to show here' if there is no preview available or 'It may take some time to show the preview - please refresh' if the preview is waiting to load in Salesforce
