

Summer 18 – Patch 14 Release Notes

Version: 1.251.24

Installation URL:

<https://login.salesforce.com/packaging/installPackage.apexp?p0=04t01000000f79E>

Below is a list of the issues that have been fixed in this Summer '18 patch:-

Bug Fixes

- Wrong formatting of text and image in the 'Page from Category' Showcase Tile when used in the 2 column layout
- Running manual batch jobs multiple times in close succession leading to too many users appearing in Adoption Analytics
- Adding an external page to Carousel with spaces at start or end of URL stops Dashboard from loading
- When an image is cropped (e.g. for a cover image) it is converted to a .JPEG but the .PNG extension incorrectly remains, meaning that the image cannot be displayed in Internet Explorer
